---

<b>Objective</b>	To pursue further knowledge with a cooperative education for summer 2017.	
<b>Education</b>	<b>Rochester Institute of Technology</b> , Rochester, NY	<i>In-Major GPA 4.00 / 4.00</i>
	Bachelor of Science in Game Design and Development	<i>GPA 3.89 / 4.00</i>
	<i>Expected Graduation: May 2019</i>	
	<b>Awards:</b> International Student Scholarship, Dean's List (Fall 2015 - Spring 2016)	
<b>Work Experience</b>	<b>Rochester Institute of Technology - Resident Advisor</b>	Rochester, NY (2017)
	- Hired to create an engaging and safe living-learning environment for residents.	
	<b>Residence Hall Association - Graphic Designer</b>	Rochester, NY (2016 - Present)
	- Designs graphics and posters to promote our events and services.	
	- Organizes activities to provide a fun and supportive environment for residents.	
	<b>IBM - Software Development Intern</b>	Bangkok, Thailand (2016)
	- Developed applications for various platforms that exhibit Watson's capabilities.	
	- Fixed the front-end of the Watson Business Case Competition's website.	
<b>Skills</b>	Languages:	C#, HTML5, CSS3, JavaScript, Python
	Tools/Framework:	Unity, jQuery, .NET, Git, RenPy, MonoGame, XNA
<b>Selected Projects</b>	<b>Fantasy Forest (C#, Unity) - Personal Project, Simulation</b> <a href="http://goo.gl/mzv4LM">goo.gl/mzv4LM</a>	
	Built a fantasy forest where autonomous characters behave and interact using algorithms such as complex path following, leader following, and flocking.	
	<b>AR Hackathon Project (C#, HoloLens) - Group Project, Simulation</b>	
	Programmed an application for the HoloLens where users can spawn random objects to interact with the room using either voice commands or gestures.	
	<b>Game Jam (C#, Unity) - Group Project, Game</b> <a href="http://goo.gl/91oKQL">goo.gl/91oKQL</a>	
	Coded a team-based game in which two players must control one character and combine specific spells to fight off monsters. This game was built in 24 hours.	
	<b>Virtual Garden (JavaScript, Canvas) - Personal Project, Simulation</b> <a href="http://goo.gl/nCj3OM">goo.gl/nCj3OM</a>	
<b>Others</b>	Designed an interactive garden using just black and white to exhibit Gestalt Psychology. Utilized algorithms such as perlin noise to simulate life-like behaviors.	
	<b>Blank Canvas (C#, MonoGame) - Group Project, Game</b> <a href="http://goo.gl/1e4WFm">goo.gl/1e4WFm</a>	
	Developed a 2D platformer game which revolves around combining colors to defeat enemies and solve puzzles.	
	<b>International Ambassador for Game Developers Conference 2017</b>	
	<b>Electronic Gaming Federation, Author</b>	<a href="http://media.egfederation.com">media.egfederation.com</a>
	Writes articles regarding game design elements and in games such as Hearthstone.	
	<b>Computer Science House, Active Member</b>	<a href="http://csh.rit.edu">csh.rit.edu</a>
	Participates in an organization that promotes learning through personal projects.
